

Potential adopters will want to start the adoption process by filling out an application on our website.

Once that application is processed, our staff will reach out, usually via email, with the next steps and a link to set up an appointment, as well as other information about visiting the shelter. We do understand this is different than how we have ever operated previously, however we have eliminated drop by walk throughs to help our staff better meet the needs of our residents and ensure our shelter remains as clean and sanitized as possible.

Thank you for choosing to adopt with us!

Please be sure your application is completely filled out. If information is missing we are unable to process the application.

We conduct background checks and follow up with your references.

If your current pets are not spayed or neutered, chipped, up to date on shots or your dog is not on a heart worm prevention medication please do not apply! We feel strongly that all companion animals should be spayed and neutered and chipped and that their vaccinations must be current for the health of the pet.

If you are not able to adopt the pet you would like please keep looking. We do our very best to ensure we find the right home for the adoptable pet and will work with you to find the right pet for you!
